

JOHNNIE HAS SHIPPING ORE

Ledges Increase and Good Values Show.

TONOPAH CAPITALISTS INVEST

Week's Doings in the District—Large Amount of Development Work Being Done.

JOHNNIE, NEV., October 7, 1906.—H. C. Word, a millionaire of Pontiac, Michigan, was a visitor last week and expressed himself surprised at the development encountered in some of the mines. Mr. Ward after going through the Johnnie Consolidated mine, said that while he had seen larger mines this could be classed as one of the big mines of Nevada, and that he was surprised at the amount of development work that had been done on the property. Mr. Ward was down in the 700 level and examined the ore shoot that had just been opened on that level and said that the showing was much more than he expected, although he had seen a number of reports of progress made in the mine. Mr. Ward also viewed the Globe property and said that beyond a doubt it was one of the richest he had ever seen. He saw the Globe before the rich strike had been made in the Rathbone-Frost lease proving the extension of the vein.

The ore shoot recently encountered by Superintendent Moser in the 700 level of the Johnnie Consolidated has been surveyed and examined and found to be 5½ feet wide, assaying between \$25 and \$30. Two shifts are now working on this level stoping the ore. The formation on this level is the same as on the levels to the surface, it being an oxidized ore with free gold. The panning in some places have been uncommonly large and would indicate that in places the ore runs much higher than the average assays show.

On the Bullfrog-Johnnie, in addition to the work being done on the new working shaft, an additional shaft is being sunk on the Annie M. claim with a view to determining the extent of the Blue Bell vein. Outcrops indicate that this claim has the extension of the Blue Bell ledge but the ground has received but little prospecting and the strength of the vein at this point has never been determined.

Work has been started on the Clana-han mines by W. S. Smith. This is the third property to operate in the mineral flat country, and as the locations have been numerous in the past few days and considerable activity may be looked for in that section of the country. This group of mines lie three quarters of a mile north of the Leadville-Johnnie, and has a galena ledge that shows remarkable values. Assays from samples taken across the face of the ledge in several places shows the gold to run as high as from \$100 to \$150, and 20 ozs. silver.

The Rathbone-Frost lease grows more valuable with every stroke of the pick. Two shifts are now working sacking the ore, and as more men can be hired, three shifts will be put to work. The ledge on the 40 level continues to yield its marvelously rich ore and the vein is widening as it approaches the Globe ground. There can be no doubt that with a little more work this lease will compare favorably with some of the bonanza leases of the northern country. No work has yet been done on the 100 level, the attention being concentrated on the upper workings. In the face of the ledge the seam of gold is as plainly visible as it is on the specimen rock.

On the Globe property the workmen are still digging in the lower tunnel and the superintendent expects get in the rich ore in about a week. Then stoping will commence and some record-breaking shipments can be looked for. The new shaft is being sunk on an extension of the Johnnie lode and is going through a 10-foot ledge that averages between \$10 and \$15.

The Leadville-Johnnie is now working an extra force of men in prospecting the Last Chance claim, which has developed some very rich indications in the last week. Besides this prospect work, the regular force is at work in No. 2 shaft.

The C. C. Beauregard lease is showing some marvelously rich ore. This lease has the extension of the ledge from the Rathbone-Frost lease. But the ledge has not yet been exploited enough to determine anything regarding the ore-body beyond the fact that some very rich ore is being sacked from the surface. When a little depth is attained on this lease, so that the ledge is well defined as may prove that the Globe Treasury vein is much larger and richer than even the Rathbone-Frost strike showed it to be.

JOHNNIE, NEV., October 9, 1906.—Goldfield and Tonopah capital is beginning to turn its attention to Johnnie and the latest to be ranked among the investors in this district are James L.

Butler, Harry Ramsey and Charles E. Knox of Tonopah, and L. L. Patrick and Frank M. Ish of Goldfield. Not only have these men invested here but they will soon commence operating and developing properties here.

All except Mr. Patrick are interested in the old Chispa mine, now known as the Congress, the mine that gave "Bob" Montgomery his start in the mining and financial world. This property has had a varied and romantic history. Ten years or so ago it was ranked as one of the big producers of the state, turning out its hundreds of thousands in billion, but there was a defect in the title and a battle ensued in which men were killed. Then, when the trouble had been adjusted, it began its career of production and gradually drifted into the hands of George and Bob Montgomery. One day a fire was discovered and before it could be extinguished the mill was a total wreck, the buildings being burned to the ground and the machinery rendered worthless. This somewhat discouraged the owners and work progressed in a desultory manner and finally was abandoned. The property passed through various hands until the present owners acquired it.

L. L. Patrick has purchased a group of mines in the mineral flat country which has showed such activity of late. Galena ledges abound here and many locations have been taken up in this section in the past few weeks.

BLANCHARD HAS FAILED TO RETURN

Ben Blanchard, who for a time was the king pin of Monarch the mushroom town that sprung up and died in the course of three weeks, has not returned from the east where he went to get funds to defray the operating expenses of the Colonial Investment Company of which he was manager.

During the boom of Monarch, Mr. Blanchard bought everything by the 20 mule team load and our local merchants gloated over the fact that their business was fast improving by the town of Monarch being on the map.

Lumber companies sent load after load of lumber to Mr. Blanchard's wild cat town and every one had an advertising sign of "For Monarch," this also had quite an effect on our local dealers. The townsites of Monarch was extensively advertised and from proceeds it is rumored that Mr. Blanchard took east with him not less than \$45,000. And even now some of the creditors think he went east in order to get capital to defray the just debts he contracted.

The wise citizens of Manhattan have attached every article that was attachable. There are a few miners left in Monarch who are daily waiting for Blanchard's return but from rumors we hear day by day all are to the effect that Blanchard has gone to Mexico to start another townsite.

Valcaldia Mill Nearly Completed

The Silver Peak Valcaldia Mining Co. are leaving no stones unturned in their effort to get the mill in working order. Between 50 and 60 men are at work in and about the mines and mill, the largest portion of this number being carpenters who are doing their utmost to get the mill building completed. Most of the milling machinery is on the ground and it is the intention of the company to have the workings in full running order before six weeks have passed. The six and one-half miles of pipe line have been completed and this gives the company an inexhaustible supply of water. The mill when completed will have a capacity of treating 50 tons of ore per day. Mr. Knight arrived from Denver Tuesday to superintend the placing of the mill machinery.

Tonopah's New Foundry.

The matter of organizing the Tonopah Foundry and Machine Works is completed, articles of incorporation have been filed and about \$30,000 worth of stock has been subscribed. As will be seen by the article published in the last issue of the BONANZA, the directorate is a strong one while the manager, F. A. Taylor, is a thorough connoisseur in that line of business. He was formerly connected with the Angels Iron Works Company, which has large foundries at Angeles Camp and Jamestown, Cal., and no better man could have been selected for the position. This new industry will be the means of keeping at home much of the money which is now going abroad, to say nothing of the convenience and the saving of time.

Good Strike on Monitor.

General Manager E. E. Knapp, of the Monitor mine states that one of the richest strikes yet found in the Monitor was uncovered last week. The ledge that was uncovered carries values principally in lead and silver. The strike was made in the north drift on the second level and goes to show that as depth is reached values increase. Mr. Knapp is very jubilant over the new strike and now has a force of 20 men at work which goes to show that he has every hope that Silver Peak is one of the coming camps of Nevada.

For the cleanest and most quiet furnished rooms in town—apply at the Bonanza Lodging House, Brougher avenue, next door to Brokers Exchange.

LEGAL

MINERAL APPLICATION NO. 1280.

UNITED STATES LAND OFFICE.
CARSON CITY, NEVADA, Sept. 12, 1906.
NOTICE IS HEREBY GIVEN THAT THE Jim Butler Tonopah Mining Company, a corporation, by Frank A. Keith, its attorney in fact, whose postoffice address is Tonopah, Nevada, has duly filed its application for a United States grant patent for the "Crescent" and "Stone Cabin" lode mining claims, claiming 120 linear feet on said "Stone Cabin" lode, with surface Sections 25 and 36, Township 3 North, Range 4 East, M. D. B. and M., in Tonopah mining district, Nye County, Nevada, and being more particularly described by official plat and field notes of the survey thereon on file in this office, designated United States Mineral Survey No. 2578, as follows, to-wit:

Beginning at Cor. No. 1, identical with Cor. No. 2, Survey 2039, McCulloch lode, on line of Survey 2012, Valley View lode, at N. 1 deg. 32 min. E. 83.5 ft. from Cor. No. 1, a porphyry stone, 6x12 inches, set 22 ft. in the ground, corner common to Sections 1 and 2 Township 3 North, Range 4 East, M. D. B. and M., and Township 3 North, Range 4 East, M. D. B. and M., bears S. 62 deg. 15 min. E. 141.74 ft.; thence S. 83 deg. 18 min. E. along line 83, survey 2012, 100 ft. to Cor. No. 2, thence same course 288.55 ft. to Cor. No. 3, identical with Cor. No. 2, Survey 2012, Valley View lode, 724 ft. to Cor. No. 4, identical with Cor. No. 4, Survey 2012, Valley View lode; thence N. 22 deg. 22 min. E. 82 ft. to Cor. No. 5, a porphyry stone, 6x12 inches, set 22 ft. in the ground, corner common to Sections 1 and 2 Township 3 North, Range 4 East, M. D. B. and M., and Township 3 North, Range 4 East, M. D. B. and M., bears S. 62 deg. 15 min. E. 141.74 ft.; thence S. 83 deg. 18 min. E. along line 83, survey 2012, 100 ft. to Cor. No. 6, thence same course 288.55 ft. to Cor. No. 7, identical with Cor. No. 6, Survey 2012, Valley View lode, 724 ft. to Cor. No. 8, identical with Cor. No. 8, Survey 2012, Valley View lode; thence N. 22 deg. 22 min. E. 82 ft. to Cor. No. 9, a porphyry stone, 6x12 inches, set 22 ft. in the ground, corner common to Sections 1 and 2 Township 3 North, Range 4 East, M. D. B. and M., and Township 3 North, Range 4 East, M. D. B. and M., bears S. 62 deg. 15 min. E. 141.74 ft.; thence S. 83 deg. 18 min. E. along line 83, survey 2012, 100 ft. to Cor. No. 10, thence same course 288.55 ft. to Cor. No. 11, identical with Cor. No. 10, Survey 2012, Valley View lode, 724 ft. to Cor. No. 12, identical with Cor. No. 12, Survey 2012, Valley View lode; thence N. 22 deg. 22 min. E. 82 ft. to Cor. No. 13, a porphyry stone, 6x12 inches, set 22 ft. in the ground, corner common to Sections 1 and 2 Township 3 North, Range 4 East, M. D. B. and M., and Township 3 North, Range 4 East, M. D. B. and M., bears S. 62 deg. 15 min. E. 141.74 ft.; thence S. 83 deg. 18 min. E. along line 83, survey 2012, 100 ft. to Cor. No. 14, thence same course 288.55 ft. to Cor. No. 15, identical with Cor. No. 14, Survey 2012, Valley View lode, 724 ft. to Cor. No. 16, identical with Cor. No. 16, Survey 2012, Valley View lode; thence N. 22 deg. 22 min. E. 82 ft. to Cor. No. 17, a porphyry stone, 6x12 inches, set 22 ft. in the ground, corner common to Sections 1 and 2 Township 3 North, Range 4 East, M. D. B. and M., and Township 3 North, Range 4 East, M. D. B. and M., bears S. 62 deg. 15 min. E. 141.74 ft.; thence S. 83 deg. 18 min. E. along line 83, survey 2012, 100 ft. to Cor. No. 18, thence same course 288.55 ft. to Cor. No. 19, identical with Cor. No. 18, Survey 2012, Valley View lode, 724 ft. to Cor. No. 20, identical with Cor. No. 20, Survey 2012, Valley View lode; thence N. 22 deg. 22 min. E. 82 ft. to Cor. No. 21, a porphyry stone, 6x12 inches, set 22 ft. in the ground, corner common to Sections 1 and 2 Township 3 North, Range 4 East, M. D. B. and M., and Township 3 North, Range 4 East, M. D. B. and M., bears S. 62 deg. 15 min. E. 141.74 ft.; thence S. 83 deg. 18 min. E. along line 83, survey 2012, 100 ft. to Cor. No. 22, thence same course 288.55 ft. to Cor. No. 23, identical with Cor.
